GONEMAD

"Planet 9"

I first heard a lot about GONEMAD back when I was just a fan of the music (2 months ago!). The first time I had ever heard the name GONEMAD was when they were featured as the Band of the Month at Nosebleed17.com. This cd, *Planet 9*, finished up last year on the Metal Detector top 100 at # 59 (Metal Detector is underground, indie, and signed bands) which is determined by the amount of radio play they get. Now, the cd is something else. Off in their own little world, GONEMAD has just made a bag of goodies for any rock fan out there, playing many different styles, a different style for each song. There is no way humanly possible to get bored with *Planet 9*. While some of the bands out now go for one main style and do nothing else (*KoRn*), that's not what you'll find GONEMAD doing. From South Florida, they do nothing but rock out, better than any others can. *Planet 9* is available for \$12 through 896 Records. In my opinion (why the hell would you read the reviews if you didn't want my opinion?!), this is the best band to come out of Florida since Cold. Pick up this musical melting-pot today!

Favorite Songs : Gravity, Sorry Seems to Lose it's Meaning, Sympathy Crutch, and Direct Approach
